REGATTA OF 'STARS'

Nearly all the "stars" of the world's rowing will come to Moscow where on August 23 25 Olympic cause they will con-tand the awards of the interna-tional "Friendship-84" tournament. Sutlice it in remember thet In of the 14 gold medals of the went to the USSR and the GDR.

Among the Soviet lowere to allend the intenament are many line world champions: women's quadruple scull and eight, the noted Pinenov brothere on the coxless pair, 1900 Olympic silver medallst Vasily

CHAMPIONS GALA IN SOFIA

The world's top rhythinic excicises participants will compete la Spita's Winter Palaco o Sports, Among those in attend the "Friendship-84" tournament, to be held on August 17-19, will he the line Bulgarian trie consisting of the world top allrounder, fillyatie Georgiyeva, the Europeon top allrounder Aueliya Ralenkova and the world cup holder f.tli tonatove. The Soviet sclool will be represented by European champlon Vilnius sludent Dalia Kulkaite, wurld champlons in Individual events Collna Beloglazova from Astrakhan and Yelena Develyarova Ironi

According to the fournament organizets, already 21 countries said they wanted to attend -- thoughty, the t5DR, Norway, Polund, the USA, the USSR, Timkey. Fronce, Switzerland, Proclamicslovelria, Yugoslavia, Japan and Bulgaria.

In road race will compete ...

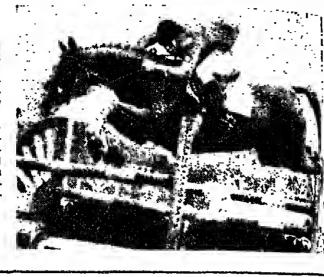

The USSR Cycling Federation has named the Soviet team for "Priendship-84" leam and bunch roarl reces to be held in

Taking part in the team race on August 23 will be world climinplons in this event Sergel Navolokin and Sergel Vomnin as well as able Yevgeny Korolkny and Vikior Kliaiov.

Early nation may field three ryclists in the bunch roce to be held on August 26. The USSR will field tenm race world chainpion Aluxonder Zinnvyev, ex-perionned Nikolel Kosyakov and fondding Asyat Saltov.

The Urozhat team featured Lithnealaea Raimuedaa Udrakie, Ed-mundae Klimovas who are winners of the Tournament of Soviel Nations, and Zigmenias Serka and Luimondas Skerts. The former three became winters of Individuel evenia.

THE OLYMPIC SHOW IN LOS ANGELES ENDS

gueso Carlos Lopes with a now record of 2:09.21.0 concluded the 23rd Olympic Games in Los Augeles, 16 Olympic days produced the following awards; USA -83, Romania-20, West Germany-17, China-15, ftely-14, Canada and Japan — len each, New Zealand—elght, Yugoslavia --seven, South Korea—six, Britain, France and Ifoliand-live ench. Austria and Finland-four rach, Sweden, Mexico and Momcco-two each, Spalu, Belglum, Australia, Kenya, Poringal and l'akislan-onn each. A total ol Il world records were sel as against 3G et the previous Mosrow Games, Dott'l get amprised: more their ball of the world life le holders were absent from Los Angeles.

The Games generated a lot of litter remarks, mostly on the atfillide of the organizers. After all who else needed ell that piopagauda show, on the Impending US presidential elections? Hopelully at the next Olympic Games business and television will not diciale their terms to albieles. We say "hopefully", because the IOC did not abow the nocessary firmness either ditring the preparation period or during the staging of the Games. The re-sponsibility for the absence of sportsmen from severel aocialist untions lies with the US edministrellor. The melicions, delibe rate propagenda, the absence of gneranices of security made the trip impossible. And this is a very serious warning for the fn-lure. Happily, the Olympics did not end with Los Angeles.

LEWIS' SUCCESS

The hero of the ethicite comwaa, undenbledly, American Carl Lewis, who won tour gold medals. He inter told a television reporter that he would

dedicate one of his medals to the widow of Jesse Owens, who won the three sprint golds and the long jump at the 1936 Berlin Olympics. He said he would give the other models to his parente, Hie compairiot Valerie Briaroflooks won the 200 m, 400 m and the 4×400 reley gulda,

Brilon Daley Thompson did excellently in the decathlon. Ever einco tho 1980 Moscow Olympics he has won all the maor evenia in that spoil - the 1902 European championships, the 1983 world championships and now his second Olympic title in Los Angoles. The only world record (allo-

scilier there were 41 athletic circuis) was eat by the US men's eam in the 4×100 m relay (0.03 oc laster than the previous re-Sebostian Coe of Bittain

celebrated his second successive win in the 1,500 m-3.32.53, Dicimar Moegenburg of West Germony won the high jump-235 cm, while world record hol-der Zhu Jianhua of China came third with 231 cm.

On the whole, the athletic contest brought little salisfac-lion, Many of the results which brought gold medals (capccially in lemale competition) were low with regards to Olympic stand-

FROM 23rd TO FIRST

This could epparently he prasible only at the Los Aogeles Games, Last year Lori Fung of Canade ceme 23rd at the world hythmic exercises championehin al Strasbourg. But to Los Angeles—Imagine III — she was second to nooel The litat champion in the history of Olympic thythmic exercises. This is how politics, introduced into sport,

Silver medallist Dolna Stanchlescu of Romania waa alxili in Strasbmirg, Regina Weber of West Germany won the bronze. But last yeer in Strasbuurg she abared 9th-10th positions.

A VICTORY AT ALL COS1S

This primarily applies to the boxing fournament. Nine of the 12 cliampions were US boxers. There was so much talk, pratests, julignation and disconient that will keep echoing for a long time to come. But the damagn is done. The champlons are named, and how likey won will be lorgotten with the passuge of time, 'flie winners, for their part, have got excellent recommendations for littling pro and the TV got profits lot telecasting odvertisements thring the boxing bouls. But what does sport has to do with that? I wonder whot the finel picture would have been if the Cubans

had compeled. The American tree prestling team won seven of the len titles in the absence of nullcles who dominate the event.

IN SHORT ADOUT SWIMMING

Thie is the strong point of US ethicles. They won 21 goals in these events. Ten world records were set. But interestingly, the hosts set only lour of them. Not a single record was set in the

simulable—they competed thank the leaders-GOR re mens. No one surpassed Vision Salnikov's time in his laws i events-the 400 m and LSO: Trostyle.

FROM the SOVIET PRESS

COUNTING ON THE CREDULOUS

Aiming to weaken the onlinucious protests in West Europenn countries, the NATO propaganda clotms that in core ogreement is reochad, missilas can supposedly bo cosity reduccil or inken out of Europe ollogother, writes in KRAS-NAYA ZVEZDA General At. Proskurin. The American missiles are even ascribed the role at some "amult nucleor umbrello" which can supposedly resider "o restricted character" io o "limited" nucleot wor, not ullawing it to grow into a generni nuclear calostrophe.

But nil this is meant for credulous and poorly informed people. Pirsily, hardly Washington storted deploying in o number of NATO countries its missiles destubilizing the strnlegic situation, only to withdraw them later on. This was done with the own of breaking the existing nucleur bulance and of gaining milliory supremacy. The US urininistration is utnikaly to give up this illusory dream. The Americans scille in Europe with their nucleor missiles quite for some time, considering the Old World os o theotre of military operations which i most convenient to: the implementation of their hegemonistic schemes. Secondly, it is common knowledge that any attribute conflict is dangerous in that it is trangitt with a most sectors threat of grawing into a general nuclear was with all the fold consequences for humanity.

ONE MORE ALLIANCE

The Reagan minimistration's desire to build a new variessive offince between Washington, Tokyo and Seoul is commenied in SOVIETSKAYA ROSSIYA by I. Leberlev.

Washington does not spenk about the true wints of the pinnned military-political bive, it exerts o lot of promonda effort in order to convince the world public that the pagonda effort in order to convince the work phone in Paulle USA parsues strictly "procedul nims" in the Asian-Paulle region. First show the oppusite, however: the building of the millimist tripurite ullimice of Wushington-Tokyo-Seoul is being put on a practical foundation. Suffice to healton the exchange with military delegations, intelligence doto and considiutions on military planning, the introduction of unfited serrete codes for the oir forces of the tirree countries and the holding of fourt navol games.

The use of Inpunese transports for furtiling military corgoes to South Korea, the presence of Inpunese observers at the Teom Spirittype was gantes, the Pentagon's pinns of using the Japanese "self-deleger luces" in the territory of South Korea - all these are additional strokes to the portrait of the nillance under construction, its militaristic spent aimed in the that place against the Askin peoples.

HURTING ARABS AND CONTRARY TO COMMON SENSE

Mashington keeps repenting that Americans are against uggression, writes I. Belyovev in LITERATURNAYA GAZETA, But os soon as Aliddle Eost territoriol poblems become involved, the Reagan intinistitution makes a sharp turn in tis opproach to the above generally accepted principle. To the delilinent of Arabs of course, and conferry to common sense. By ossuming a vegotive offliade foreards the new Soviet pro-posols on the Middle East settlement, the USA demonstrates to the tyhole world that it approves of seizure of others' land by aggression. There can be no other interpretation to the US

Now, about the second objection of the Reagon administration ognins; the Soviet proposuls. The USA is ogninst returning bast Jerusalem to the Ambs which should become, as the Sovial Union considers, on inclienable post of the Palestine state. Those who determine now the American policy in the region hove demonstroled in this case that they neglect not only the Polestinians, not only the Arabs, but also oil Moderns.

WELL-FOUNDED ANXIETY

Noting that the US policy with regard to Pokision has become more octive, V. Ganshin asks in his orticle in

What is the volue of Pokiston to the USA? The onswer con be found in the loci of the creotion by the USA of the Central Command for carrying out military operations in creas which are not covered by the US of med forces in the Atlantic and Pacific Oceans. The CENTCOM outhortly streichea now from Pakiston to Kenyo. As we can see, the geogrophy of the ropid daployment torce—CENTCOM has in foci been sel up to moke use of this-encompasses on extenaive region including Indio, Alghoniston and the Poraton Guil. These three locations must be the most important nerve can-

tres which Washington wonta to influence.

The rearmament of Islamabad, supplying it from Pontagon orients with lotest weapons, including the NATO F-16 lighter-bombets and missites of various classes, arouse welliounded onxiely in Dothi. The continuing provocations against India, which are corried out by Paklaton. In close contact with the CtA and involve use of Sikh separatists, leave no doubts about the US strategic alms.

possible to obtain thiormation about high-speed impact only when the "bullot" and the "tar-Rel" are moving not laster then 20 km per second.

In se much se the sphere of space speeds, close to 100 km per second, is so lar ineccessib-le for direct experiment, the theoreticians heve the lines say.
Researchers from the Institute
of Theoretical Physics of the USSR Academy al Sciances, modalling ibia complicated phenomecon on a computer; succeeded for the first time in describing quantitatively this describing quantitatively this process and suggested a method which makes it possible to obtain a sufficient safety margin at the shield of the space probe meant from the expanses of the comet from the expanses of

the universe.

VIEWPOINT

THE FUTURE **ACQUIRES** A NUCLEAR **DIMENSION**

Leonid KORENEV. economic observer

The Savial Union has developed euclear enorgy at a viry last rote. Between 1976 and 190 the country's nuclear capacity increased by 8,000 megawutts and is expected to increase by another 24-25,000 inegaivalls by 1005. The aunual nuctear capacity tacrement in the ulnelice is calimated at t0,000 megawalts.

Why la suclear sasrgy given priority to the USSRI The Se viot Union, which is known in be a priority tu the lield with the wmld's Hist suclear stattee unt into operation some thirty years ago not far from Muscow initially hull up its nuclear capacity of a very moderate rate; in 1975 nuclear cuerny amounted to less than 2 per ceu of the country's electric energy

Tremembus amounts of ron ventional evergy hiela tone-fill of the worhl'a lotal extraction) can explain this, inr the Sovie Interview took this advantage I develop a saler and more costefficient nuclear icchnologies Over that pertoit of develop ment conventional facts were produced at a rate enough t neel domestic and remarkable exput remirements, this how ever was not a solution to the problem but rather a postpone nent of IL In general, sorh energy fuels

as oil and gas are not itmitters of enewabte, and moreover, they will be needed for tuline gene rations loo, eed not as as energy luel but rather as a source mais rial for the chemical tedustryle produce naw materiale which natura lailed le produco for us ti la cely cotural that the USSR Energy Programma cover log two decades centers on nu lear energy. The spectile ene Ry patiers in the country can expleis this 90 per cent of all cuowe coal, oil and gas ta al ueled in remoto ereas with very hersb environmeel, while over 80 per cent of all the eaer gy is consumed ie the country's Curopean part, very poor le energy resources but vory pow orlut ledestrially. Energy fuel therefore are to be transported or pumped a distance of thom anda of kilometres. For instance, Siberla produces more than valent. Nectear feels ere keewn to produce elmost 2.5 million limes more energy than a com-parebla quantity of cosl. This reduces transport costs sed exlains the fect thei most of S viet euclear etations are affed i he European USSR.

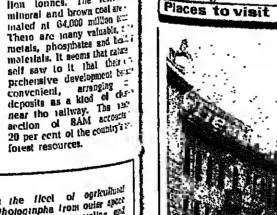

Nuclear energy has ecquired powerful basin over file past years. The first 1,500 megewatt Liliuenia and will become typical power uell for fulure nuclear stations. The country has sterted producing breed reactors tecreasing by many llases the energy yield of mranium raw meterials. Figure nuclear coorgy is less expensive than that produced by elations burning fuel off eat Doubast

One more edvantege of nuclaer energy ie lis ecological selely. The radiation background near e nuclear etallos coolrol penel is lower than thei of bome TV set.

Specialisis believe that once complated the nuclear energy programme will be able to meet the growing demand in electrisome 400 to 500 million tonner of fuels annually.

meintained, has both, economic and hielaric value, so it is a symbol of frieadship between our WEST GERMAN PUBLIC FIGURES VOICE OUT THEIR OPINION ON EAST-WEST TRADE

Weshington's policy of "sanc-tions" ead discrimination causes in the first place e weakening in the ecoaemic positions of the Wast Europesa cauntries and Japan. This is why the Reagan admiolatellon's line of curtalling trade-economic and scientific-lechnalogical relations with the CM8A member-countries meets with mounting resistance on the part of business and po-Illical circles of West Germany. Parlicular dissatiafaction has

neen ceused by the recent NATO decision la furifier resirici live axport liet for goods and technologies, taken under e strong pressure from Washing-ton. The Faderal Secretary of the Sociel Democretic Party at Germeny P. Glotz called the de-cialon "e tool used by the USA to suppress its ocanomic rivels".

Taking account of the oncoming economic crisis ead the growing unemployment, he stressed in an interview Prenkfuriar Rundschau" nawspaper, a further il-mitation af trede with the East is e palitically liresponsible decision. By egracing la il. Wast Germeoy loses lis sovereignly la ea ever greater degrae.

The SDPG leader noted that further limitetion af the export would strangly damage the West European, business circles. The stlempts at the Whits Hause ta

subetentiata the discriminatory measures with "security canside rations" ere quite unienable. P. Glatz futher etressed. H. Siemann, accrsiary at the Federal Association for Wholesale and Foreign Trade, seld Weshing-ton's diacriminatory policy "greetly demages" the West
